

FASD committee

During the past year, the activities of this committee have focused upon consolidation of the purpose and focus of the committee and spending a small grant of \$250.00 that was provided by the provincial FASD coalition. As a result of our discussions regarding the ongoing need for this committee-

- It was felt that the committee was valuable in terms of sharing information regarding workshops and other information regarding FASD
- It was indicated that promoting awareness continued to be important in terms of both public and professional resources
- It was further stated that the committee should be perhaps meeting less (3 x a year) rather than the current monthly schedule.
- Discussion regarding creation of a FASD committee pamphlet

We also have a number of new resources that are available for sign out. Please see Maria Kent/Debra Aikens for more information.
